Would you like to hear a great story?

A profoundly human and musical story...

A story of beautiful encounters made around djembe, congas, songs, rap, slam, loops, body percussion,...

A story of encounters between music therapy and adolescent refugees, young adults and families.

A story that has been going on for 5 years now.

A story where exiles, journeys, sufferings, traumas, hopes, documents, expectations, nostalgia, integration,.. are told on rhythms, melodies, song texts.

A story where the universality of the musical language takes on its full meaning and transcends all borders.

Presentation (on Zoom) by Mr. Olivier Mallach
